

Removing Group Members

The group manager has the ability to add group members (users), remove group members as well as set additional group managers. Registered website users also have the ability to 'Request Group Membership' to join existing groups. NOTE: The group manager must approve member requests before users have the ability to view restricted group content or add group content.

Removing Group Members

1. Navigate to the Group Page you want to remove members from. Be sure you are logged in to the site, and are one of the Group Managers for the group.
2. Click the 'Group' tab just below the Page Title (at the top of the page or just under the feature image/video).

Addressing Course Cross Compatibility

3. Select 'People'.

4. Click 'remove' on the far right side of the users row in the member list. Optional – To remove multiple users, check the box to the left of the users to remove. Then select 'Remove from group' in the 'Operations' section, then click 'Execute' .
